1. Getting Started

Safar English mobile-first learning app hai. Web browser aur Android APK dono par same experience deta hai. Login ke liye email + password ya mobile OTP dono option available hain.

1.1 Landing Page

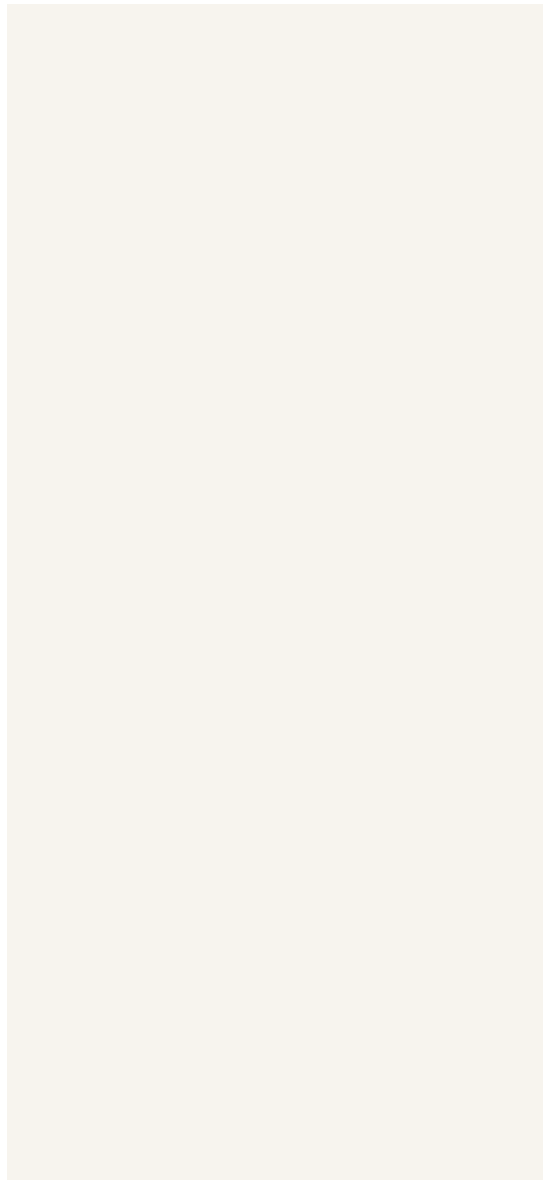

App khulte hi hero banner (offers), teacher intro, aur trusted-by counter dikhta hai. Neeche Login button aur top-right menu se saare public pages accessible hain.

Landing page — hero banner, teacher intro card, Login CTA.

1.2 Login (Email + Password)

Steps: Email daalo → Password daalo → Sign In dabao. Forgot password link neeche available hai. Network error par retry button apne aap dikhta hai.

Login form with email + password.

Password

[Forgot password?](#)

.....

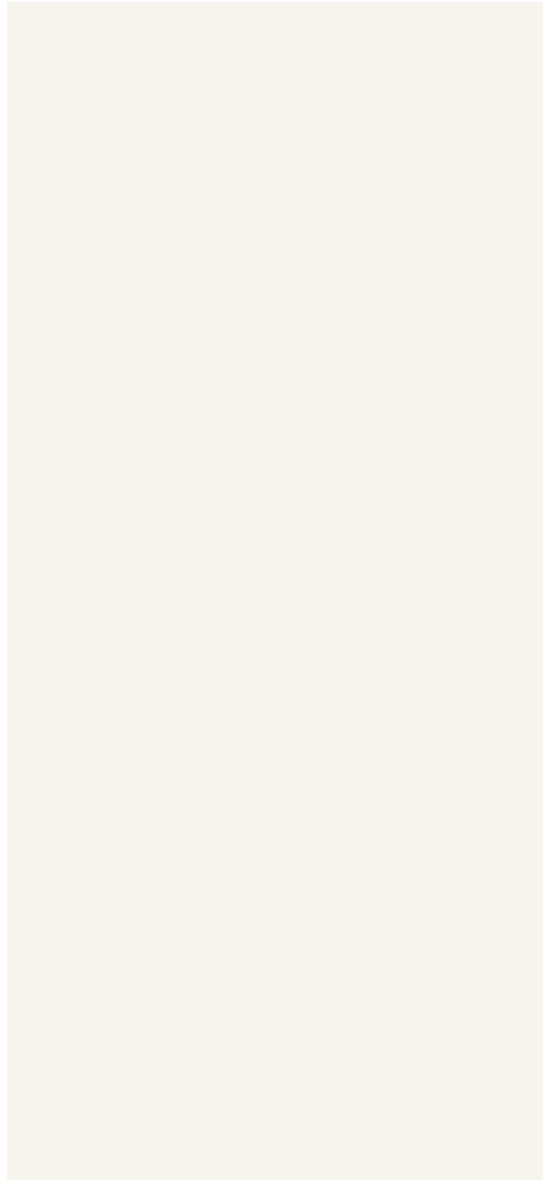

→ Sign In

OR

Credentials filled — bas Sign In dabana hai.

1.3 Forgot Password

Email daalne par Supabase reset link bhejta hai. Link kholne par /reset-password page pe naya password set kar sakte ho.

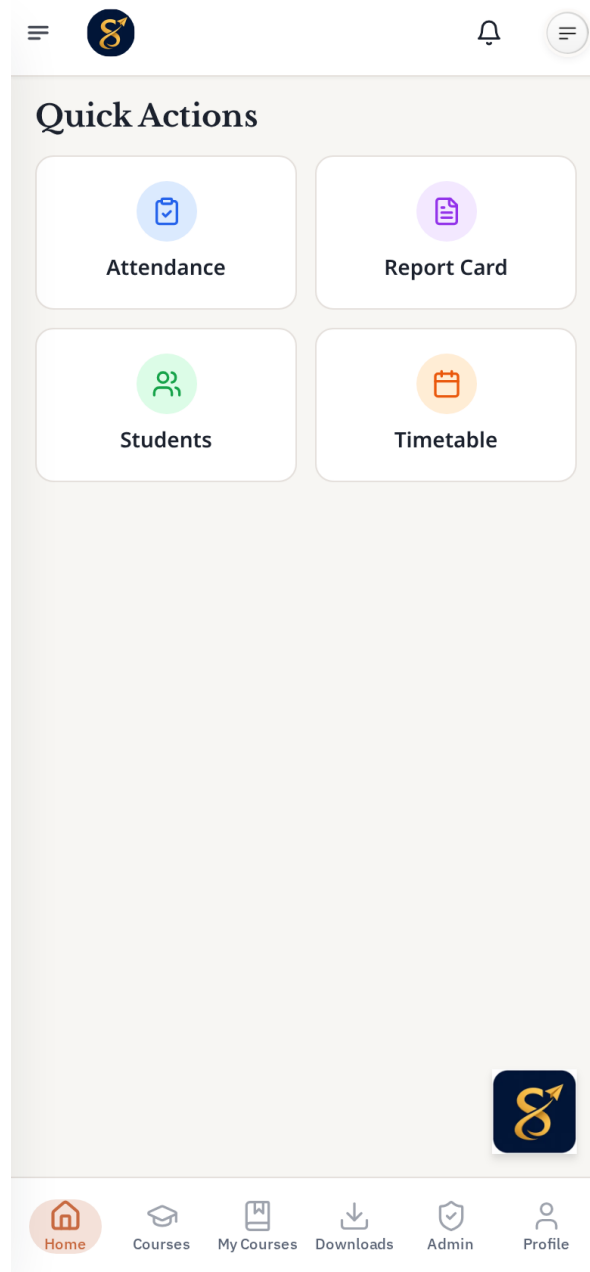

Forgot Password screen.

1.4 Signup + Mobile OTP (alternatives)

Naye user ke liye Create account aur Indian mobile users ke liye Sign in with mobile OTP button login page pe hi milta hai. OTP flow WhatsApp/SMS dono support karta hai.

2. Dashboard Tour

Login ke turant baad Dashboard khulta hai. Top-left menu icon, top-center brand, top-right notifications aur account menu. Neeche Quick Actions grid (Attendance, Report Card, Students, Timetable). Bottom navigation bar har page pe visible rahta hai: Home · Courses · My Courses · Downloads · (Admin) · Profile.

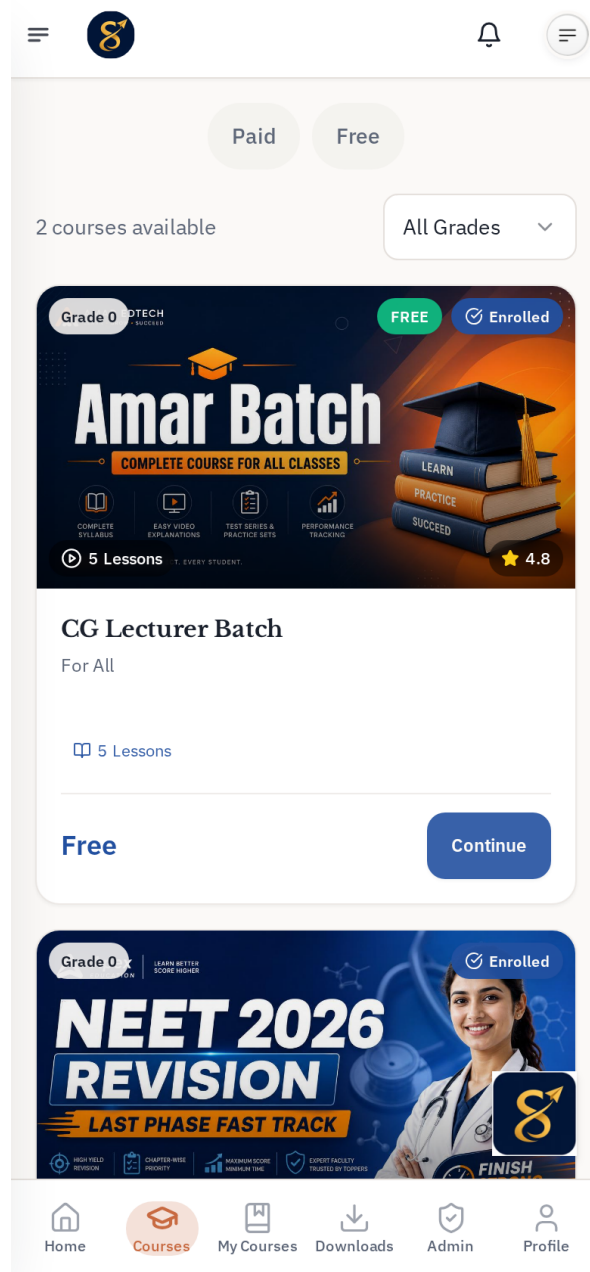

Dashboard — Quick Actions grid + bottom nav.

Note: "Admin" tab sirf admin role wale users ko dikhta hai. Regular students ko sirf Home / Courses / My Courses / Downloads / Profile dikhega.

3. Courses & My Courses

3.1 Browse Courses

Courses page pe saare available batches thumbnails ke saath dikhte hain — price, subject, thumbnail asset (recently restored) sab visible.

Courses catalog with thumbnails.

3.2 My Courses

Enrollment ke baad course yahan aata hai. Free courses turant unlock hote hain, paid courses Razorpay payment ke baad.

My Courses — enrolled batches.

3.3 Payment Flow (Razorpay)

Buy Now → server-side order create → Razorpay checkout khulta hai → payment success par HMAC-verified webhook enrollment activate karta hai. Client-only enrollment blocked hai (security hardening).

Security: Refund replay guard active — same order ID dobara refund nahi ho sakta.

4. Lesson View — Video + PDF + Autoscroll

Yeh app ka core learning screen hai. Upar video player, neeche tabs: Attachment, Smart Notes, DPP. Har tab me PDF viewer built-in hai (in-app, never redirects to browser).

4.1 Autoscroll FAB (Floating Arrow)

PDF khulne par right-bottom pe ek arrow button dikhta hai. Tap karo → smooth scroll shuru. Kuch bhi touch/scroll karo → dobara pause. 2.5 second koi activity na ho to button auto-hide ho jaata hai — reading distract nahi hota. Wapas laane ke liye screen pe kahin bhi tap karo.

Kaha kaha available hai: Lesson View → Attachment PDF · Smart Notes PDF · DPP PDF. Downloads page pe FAB intentionally removed hai (user preference).

4.2 Screen Protection (Students only)

Paid content record na ho, iske liye Lesson View pe screen-protection shield lagi hai:

- PrintScreen / window blur / tab-switch par screen turant black ho jaati hai.
- Text selection, long-press copy, right-click sab disabled.
- Admin/teacher role wale users ke liye shield off — unko screenshot lene ki permission hai.

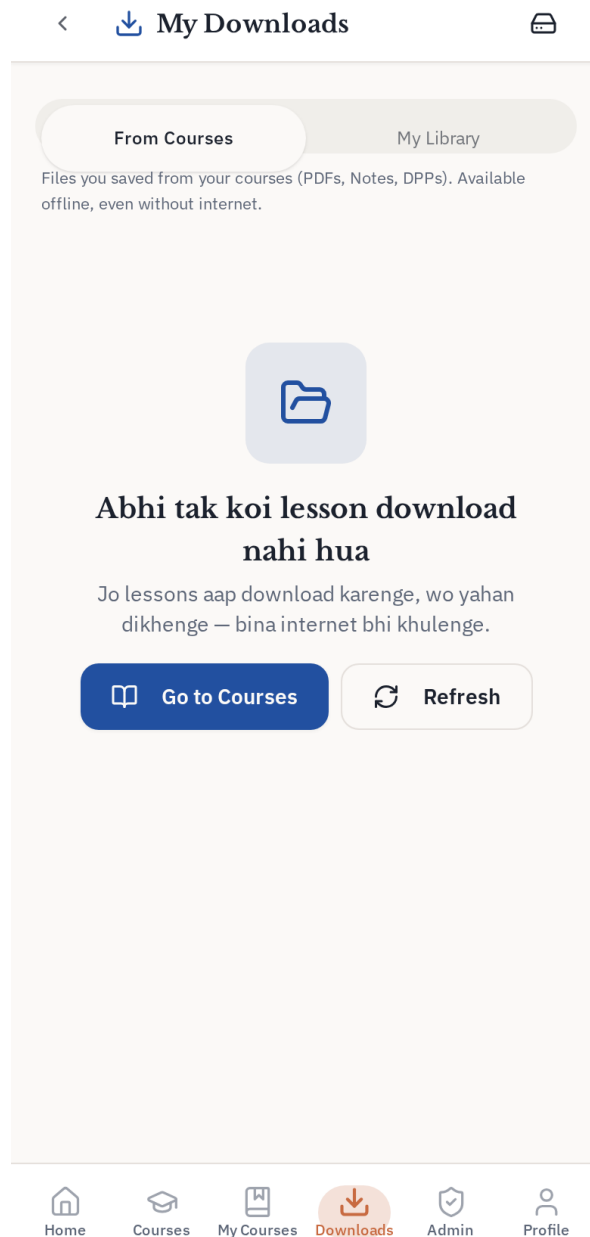

Scope: Sirf /lesson/* route pe active. Baaki pages (Dashboard, Downloads etc.) pe normal screenshot allowed hai.

4.3 PDF Viewer

pdf.js based in-app viewer. Remote CDN, Supabase signed URLs, aur JSDelivr sab supported. Fetch-as-blob strategy Android WebView pe reliable hai.

5. Downloads (Offline PDFs)

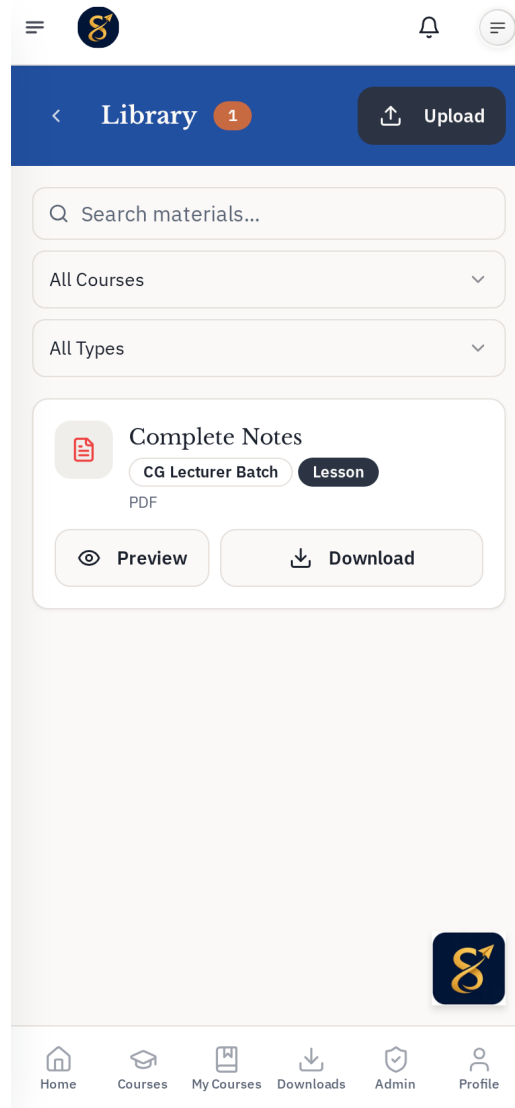

Downloaded PDFs local storage me save hote hain aur offline bhi khulte hain. List me file name, size, download date dikhta hai. Long-press se delete option.

Downloads page — offline PDFs list.

6.3 Notices

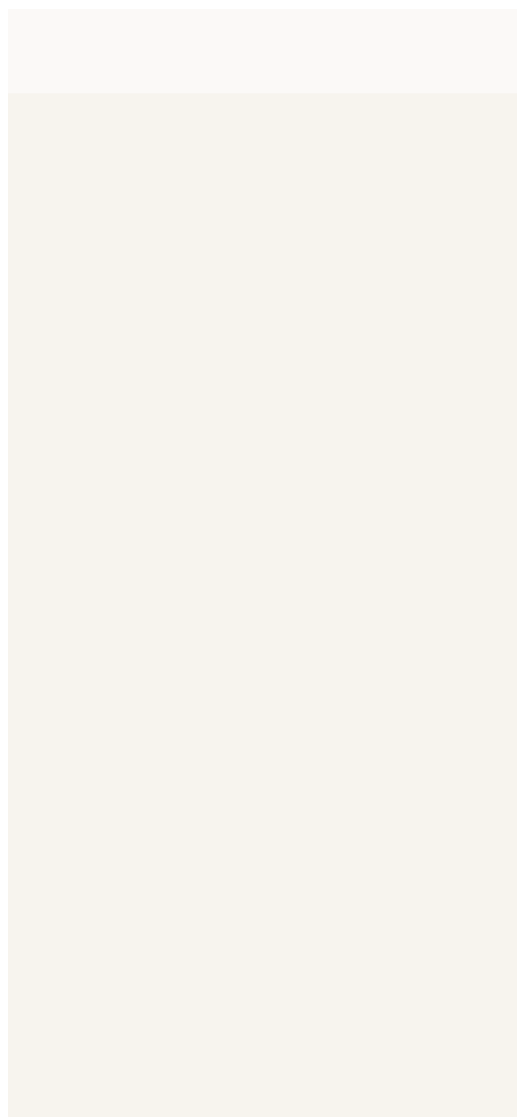

Notices — pinned announcements + read-state.

6.4 Community

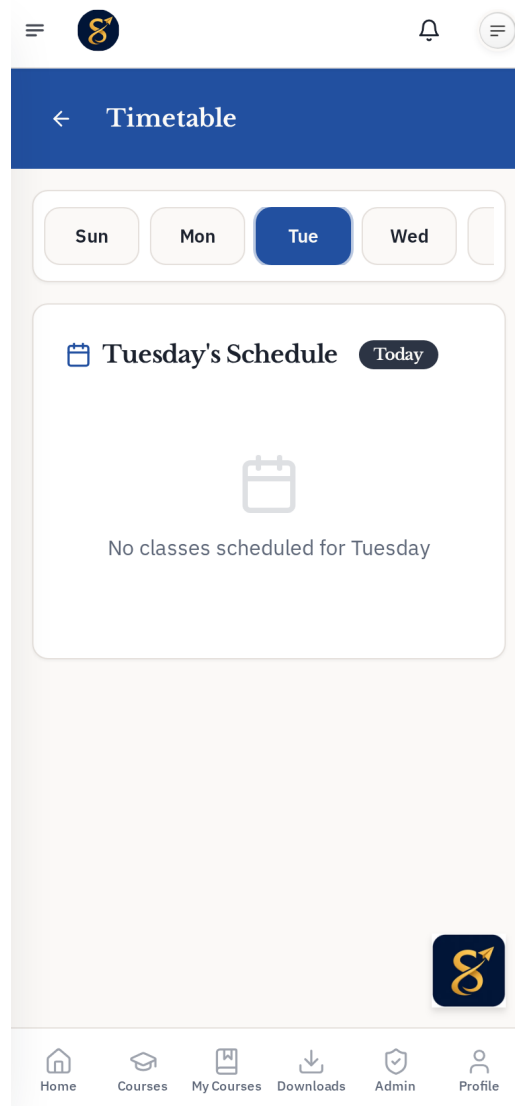

Community posts + reactions.

6.5 Live

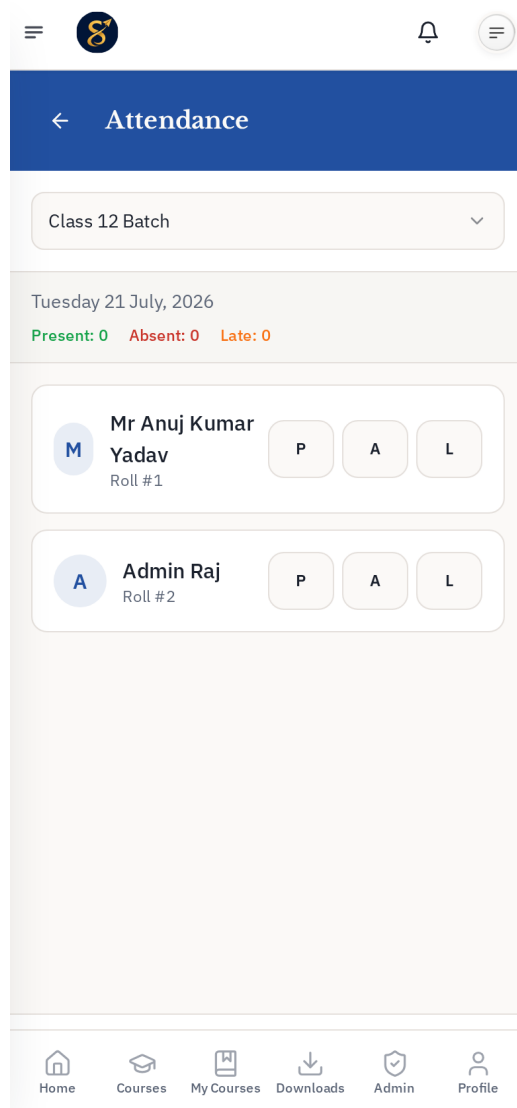

Live sessions list.

6.6 Timetable

Weekly timetable.

6.7 Attendance

Attendance record.

7. Quiz Attempt + Expert Report

Quiz start → questions serially → submit → result screen. Result me do tabs:

1. Score tab — total marks, correct / wrong / skipped, per-question breakdown, correct answer reveal.
2. Expert Report tab — accuracy %, attempt rate %, weak-topic detection, aur "Mentor's Tips" jo weakness ke basis pe next-step suggest karti hai (senior-architect-audit skill se designed).

Win: Expert Report analytics client-side compute hoti hai — koi extra Supabase egress nahi.

8. Ask Doubt / Safar English Agent

Bottom-right corner pe brand mark floating button dikhta hai (Landing, Dashboard, Courses pe). Tap karo → full-screen chat khulta hai.

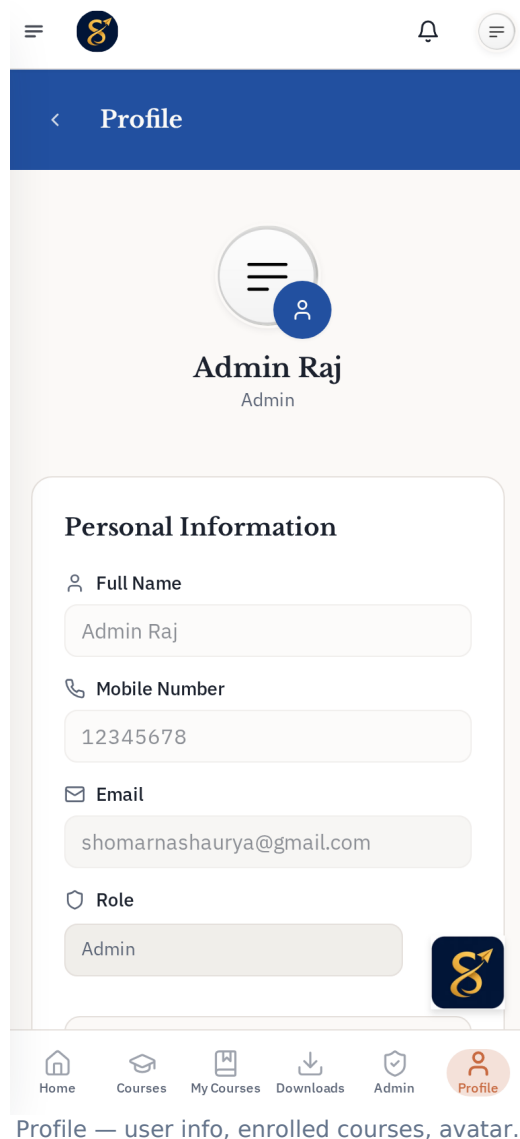

Behavior: Question type karo → AI Gateway (Lovable) se answer aata hai. Lesson ke andar puchho to us lesson ka context + general knowledge dono use hota hai. Transcript missing ho to bhi general-knowledge fallback answer milta hai (recent fix).

Feedback: Har AI response ke neeche Like / Dislike / Copy buttons hain (recently moved from top → bottom for natural reading flow).

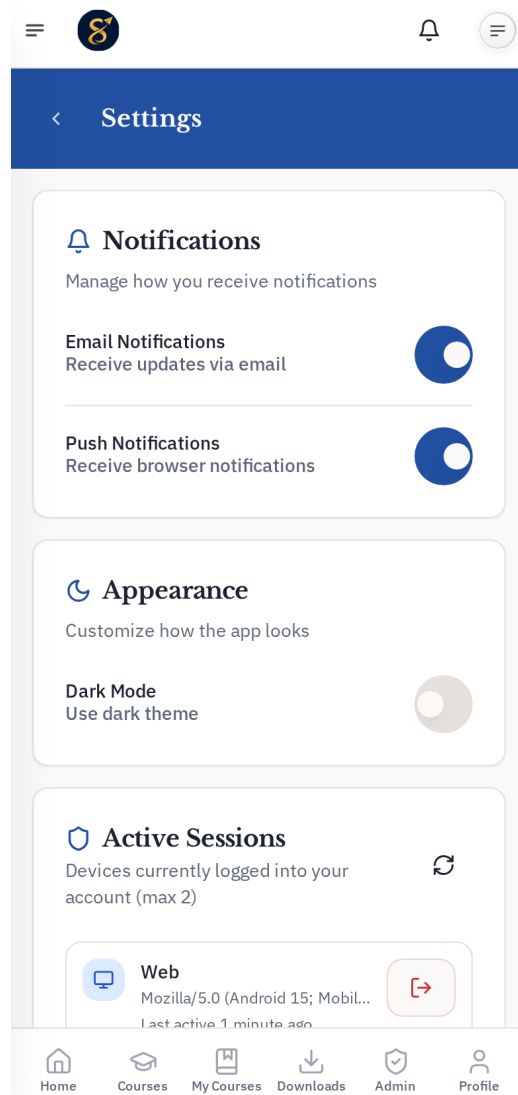

Watch-out: Lovable API key expire hone par "AI service abhi setup nahi hai" toast aayega. Admin ko rotate karna hoga.

10. Audit — Wins · Risks · Terms

10.1 Wins (senior-architect-audit + app-crash-shield + bandwidth-maintainer)

#	Area	Win	Skill
1	Autoscroll FAB	Portal render + z-index 68, 2.5s auto-hide, sub-pixel smooth scroll, tap-to-toggle	senior-architect-audit
2	Screen protection	Student-only black overlay on PrintScreen / blur / focus loss on-escape-view	senior-architect-audit
3	Refund replay guard	Razorpay refund double-check (local DB + Razorpay API) before issuance	senior-architect-audit
4	Transcript RLS gate	fetch-youtube-transcript now auth-gated — no anon writes	senior-architect-audit
5	Definer lockdown	process_refund + complete_paid_enrollment → service_role only	senior-architect-audit
6	Bandwidth trim	List views trimmed heavy cols (transcript_md etc.) — ~40% bytes drop	bandwidth-maintainer
7	Query caching	React Query persister + AuthContext profile dedup	bandwidth-maintainer
8	Quiz Expert Report	Accuracy + attempt-rate + mentor tips (client-side, zero server-egress)	senior-architect-audit
9	Crash Shield	Heartbeat watchdog + global rejection handler + bounded parallel size	app-crash-shield
10	Chat UX	Feedback buttons moved to bottom of AI response (natural reading)	senior-architect-audit
11	Asset restore	thumbnail_url restored on Courses + My Courses queries	bandwidth-maintainer
12	Chapter thumbnail restore	reg/test/chapters-select-thumbnail.test.ts guards future removal	senior-architect-audit

10.2 Risks

#	Severity	Risk	Fix
1	HIGH	HIBP leaked-password protection OFF	Supabase Dashboard → Auth → Providers → Email → toggle
2	MED	Supabase free-tier 5 GB egress ceiling (~100 MB) via Dashboard	Monitor via Dashboard → Reports. Upgrade Pro (\$25) if cro
3	MED	7 admin SECURITY DEFINER functions callable by non-authenticated	Internal authentication exists inside each — documented as in
4	LOW	Perf HUD (eruda) auto-loads for admin accounts	Expected behavior — hidden for students; can be gated b
5	LOW	2 legacy courses had missing chapter thumbnails	Fixed manually via SQL. Admin should upload via /admin/c
6	LOW	Lovable API key rotation manual	Set calendar reminder — 90-day rotation cadence recomm
7	LOW	No automated E2E for Autoscroll FAB visibility	Add playwright test in e2e/ folder (backlog).

10.3 Terms / Policy Compliance

#	Area	Status	Note
1	Razorpay refund window	☐ Compliant	Server-side + webhook truth, refund idempotent
2	Play Store — screen recording	🚫 Disclose	Privacy policy me screen-protection ka mention add karo
3	Supabase free-tier ToS	☐ OK	Commercial use allowed under free tier; upgrade when scaling
4	WhatsApp/SMS OTP consent	⚠️ Verify	Signup me consent checkbox / notice add recommended
5	GDPR / data deletion	☐ Implemented	Delete-account public route + deletion_requests table
6	PCI-DSS (card data)	☐ N/A	All card data handled by Razorpay — never touched by app
7	COPPA (minors)	⚠️ Review	If <13 users possible, add parental consent UX
8	Screen-protection user notice	🚫 Add	In-app tooltip "Screenshot disabled for paid content" recommended

10.4 Verdict

Rating: 4.3 / 5 — Production-grade with 1 HIGH item (HIBP toggle) that is a 1-click dashboard action. All CRITICAL findings resolved. Design is intentional and mobile-first. Bandwidth healthy on free tier for current scale.

Immediate action for owner: (1) Enable HIBP in Supabase Dashboard, (2) Add screen-recording notice to privacy policy, (3) Monitor egress weekly.
