Chemical Composition

Properties	Solid	Liquid	Gas
<u>Definition</u> →	Collection of molecules which have following properties	Collection of molecules which have following properties	Collection of molecules which have following properties
1. <u>Shape</u> →	fixed shape	not fixed shape	not fixed shape
2. <u>Volume</u> →	fixed volume	fixed volume	not fixed volume जिस Container में gas को रखते हो, उसी का Vol. occupy करता है।

Properties	Solid	Liquid	Gas
3. Force	→ Strong force act → tightly packed → only vibrate in fixed position 	→ act weak force → move Collectively 	→ No Force b/w molecule ($F_g=0$) → Random motion → large space b/w molecule
