

Evidence Based Study Tips

①

*Make it Stick.

"For the vast majority people & student are not getting marks. What they getting Reason is because they Not Testing Enough. We should Test yourself two most fundamental things."

"The harder the Brain have to do something to Read & Learn & Understand the more Brain Remember that concept Stick."

Like → Muscle Memory

<u>During class Notes</u>	<u>After class</u>
1) It help to awake in during lecture time	1) Active Recall the Question
	2) To Consolidate the Content Cornell Note taking method.
	3) What different Que. I made
	4) Flashcard will understand Based upon & Testing yourself. 2-3 time

"The harder is that work to do something the more likely you should be do learn better in future."

"The more brain have to effort to work & understanding something then more synapse are strengthening that connection?"

Scoping the Subject.

- we have to understand the Broad Picture & minor picture of the Content

→ Understanding the trees
 ↗ Branches.
 ↘ Leaf

Categorise things

Bird's eye view	Frog Eye view.
-----------------	----------------

• At holistic Approach

• Deep Review & Remembrances of Knowledge.

* Broad Picture & Understanding
→ that tears out of coherence of Own mind & clarify of Concept & Understanding

→ Internal Chatterbox (Thinking)	Birding Concept from Scratch	Feynman Technique

! Understanding

• Coherence

• Unexplained Question Understand & tryin to find answers from the lecture Notes.

• Developing the Syllabus yourself.

• Stick to the content & Believe one book do mastered that help to understand. Supplementary Book will all of them will also covered inside.

Space Repeation & power of Active Recall.

→ forgetting Curve

• How Information Sustain Better.

The Retrospective Revision Time table.

• Effectively Recall

• Entire Content

It could be little bit one, Two, three topic you have to switch Simultaneously.

Mindmap & Spider Diagram [One page. Notes that Deep Inside] (3)

- Active Recall.
- Can I Recreate Syllabus content from scratch.
- Have to do Cognitive labour

Memory Techniques.

- Mnemonics / Easy Ways to Remember

Some → Scaphoid
 Loves → Lunate
 Toy → Trapezium
 Position → Pisiform
 that → Trapezium
 They → Trapezoid.
 Can't → Capitulum.
 Handle → Hamate

Song & Pict

- SKIN & LIMP.
- 4's → site size, surface shape
- 3 ts → tethering, Temperature
- Tenderness.

Can I Rearrange Something - what
 Short Mnemonic:

List →

Mind Place

- Categorisation → Different Room
- Categorisation → Categorisation

PEC Method

Remember Number

Write tons of Questions.

→ Answer it do better in Doc file format

Your Bible will make anki.

You have to change approach of

Studying.

#

Avoid these thing

- Writing lecture Notes.
- Never made Note after class.
- Summarizing & Highlighting
- Rereading is less effective to Recall.
- Do not waste time answer the Question at in your Notebook.
- find Information & Active Recall
